Presents

Free Webinar

Introduction to Domestic Violence & Strangulation

Tuesday, May 19, 2015
1:00 PM-2:00 PM

Featuring

Ruth Downing, MSN, RN, CNP, SANE-A
Founder & President

Forensic Healthcare Consulting & Strangulation Expert/Trainer in Ohio

Non-fatal strangulation is a common occurrence in DV relationships.

Although it may leave no marks, it can have great impact, including brain damage & delayed death.

Health care providers & medical professionals will learn the signs & symptoms to look for that may indicate internal injuries.

DV advocates, law enforcement & prosecutors will learn why these injuries may be lethal in order to adequately support victims & respond appropriately.

Subjects covered:

- Choking vs Strangulation
- Short & long-term effects
- Signs & symptoms: Why they are ignored
- Increased homicide risks & current Ohio law

Application pending for Counselor, Social Worker and Marriage & Family Therapist CEUs. Nurses may apply CSWMFT CEUs to their CE requirements.
